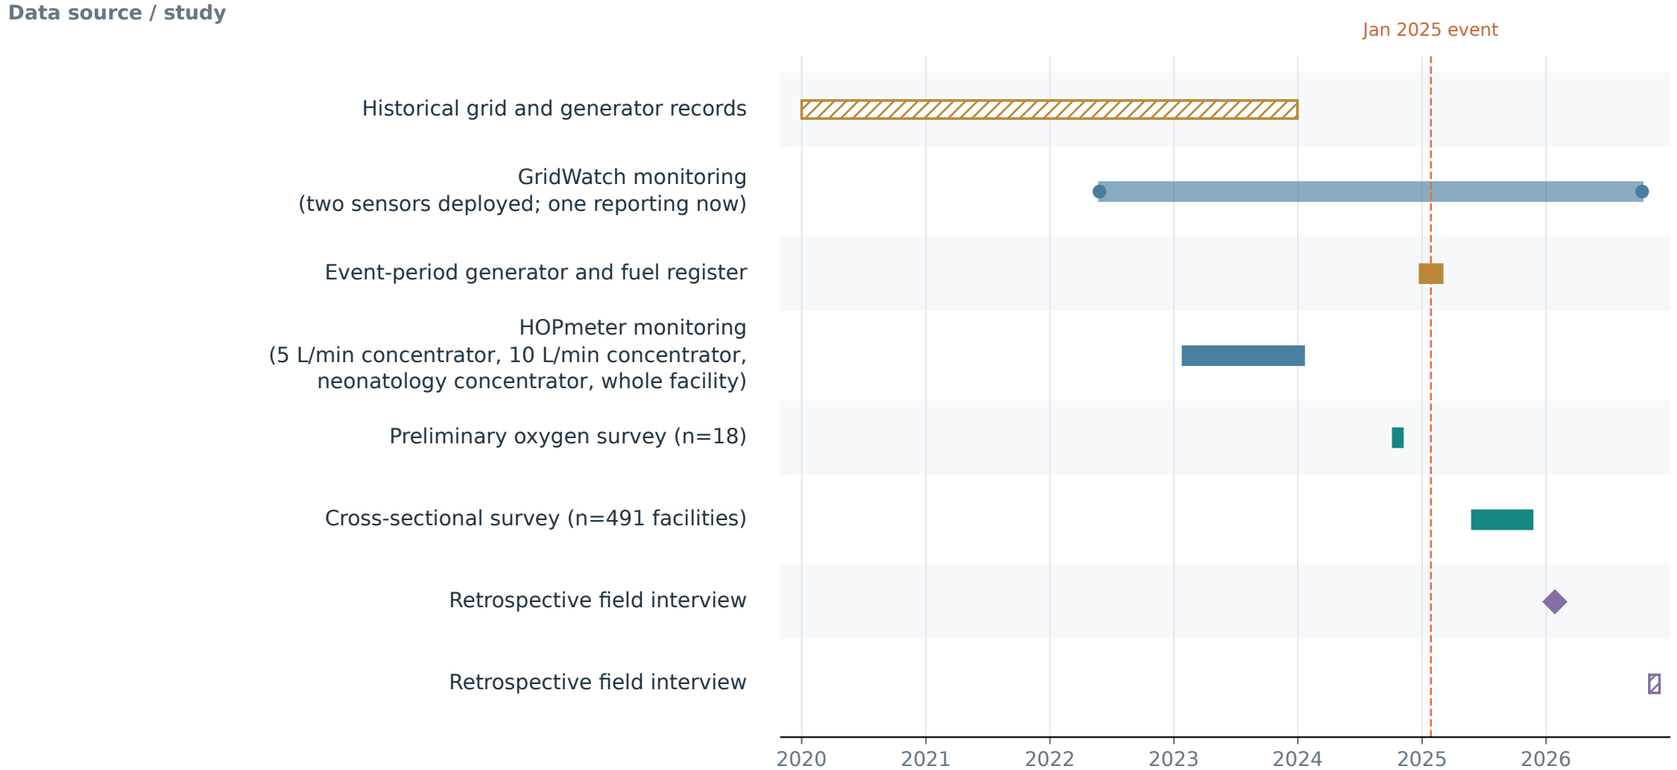
DRC3a study data and monitoring timeline

Ndosho electricity and operating records, comparative surveys and follow-up interviews



Collection period

2020-2023
Master spreadsheet and overlapping 2023 transcription

May 2022-Oct 2026
Two sensor histories grouped in one monitoring band

Dec 2024-Mar 2025
Runtime and fuel entries spanning the January event

Jan 2023-Jan 2024
13 load files combined; listed loads are selected examples

Oct-Nov 2024
Facility and ward oxygen assessment

May-Nov 2025
Submission dates; 565 forms / 518 retained respondents

27 Jan 2026
Recorded retrospective account

Nov 2026 - planned
Follow-up interview; exact date to be set

Monitoring bands show programme or file spans, not uninterrupted data coverage. Sensor completeness is audited separately.

HOPmeter combines device-specific periods; no files overlap the January 2025 event. November 2026 is planned.

As of 11 October 2026. Source links, date qualifications and sample definitions: dataset_time_mapping.csv.
